Würzburger Mathematisches Kolloquium

Wintersemester 2023/2024

Forschungsbau, Emil-Fischer-Str. 41, 00.006

Di 24.10.2023 14:15	Prof. Dr. Zetra Hainul Putra **(Universitas Riau, Pekanbaru, Indonesia)** **Integration of Digital Technology in Mathematics Instruction in Elementary School: The Case of Teacher Professional Development in Indonesia**
Di 07.11.2023 14:15	PD Dr. Markus Weimar — Habilitationsvorlesung **(Institut für Mathematik, Julius-Maximilians-Universität Würzburg)** **Harmonic Analysis meets Applications: Wavelet-based Function Spaces and Optimal Approximations of their Embeddings**
Di 28.11.2023 14:15	Prof. Dr. Olga Aryasova **(Institute of Geophysics, National Academy of Sciences of Ukraine and Igor Sikorsky Kyiv Polytechnic Institute / Giovanni-Prodi-Gastprofessorin in diesem Semester)** **Homogenization of a Multivariate Diffusion with Semipermeable Interfaces**
Di 19.12.2023 14:15	Prof. Dr. Franziska Jahnke **(Universität Münster)** **Transfer Theorems between Fields of Different Characteristic — A Model-theoretic Approach**
Di 16.01.2024 14:15	Prof. Dr. Leon Bungert — Antrittsvorlesung **(Institut für Mathematik, Julius-Maximilians-Universität Würzburg)** **The Mathematics of Adversarial Machine Learning**
Di 30.01.2024 14:15	Prof. Dr. Jan-Frederik Pietschmann **(Universität Augsburg)** **Optimal Transport on Metric Graphs**
